### TO THE PEOPLE OF THE LEHIGH VALLEY--

It is with a sense of pride that we present to the people of the Lehigh Valley our first annual catalogue.--A pride in having been able over a period of one hundred twenty years to serve our customers with items for building to help the progress of our great valley. We feel, however, that many of our friends and customers are not fully aware of the large variety of items we are handling and are taking this means of acquainting you with our stocks and the services we have to offer.

Priorities need not frighten you. True-- to construct a new home at the time this magazine has gone to press requires authorization from the WPB. However there is no limit to the amount of REPAIR & MAINTENANCE you may do to your property, and it is amazing the amount of maintenance work you can do without using critical materials. In addition to the above, farmers have an automatic priority whereby they may erect NEW FARM BUILDINGS up to a total cost of \$1,000.00 without application for government permission.

We believe you will find in this catalogue many items which will be of interest to you in helping you keep your home or farm in first class repair, and also in enhancing its present livability. A few of the items listed may, in the course of the next several months, be government restricted (they will be marked \*), and we ask your indulgence in these critical times. However we can assure you that all our facilities are at work to keep stocks of everything shown herein available to all our old and new customers.

To our farm customers we offer many plans and ideas for housing poultry and hogs, barns for cattle, crop storage buildings and some mighty fine ideas for farm equipment which most of you can build yourselves. Stop in and ask us for any of the above services or call us and we will mail them to you.

We suggest that you keep this catalogue handy and refer to it often. Just call 7-4151--ask for the Sales Department and they will be glad to answer your questions; or better still, drop in at one of our offices--315 Brodhead Avenue or 135 Main Street and we will be proud to show you the items in person.

Very truly yours,

BROWN-BORHEK COMPANY

# A FEW FACTS ABOUT BROWN-BORHEK COMPANY

*Established in 1820—Doing business at the same location under the same ownership for 124 years*

- ★ Operating two large lumber yards and a large woodworking mill.

- ★ Three to five million feet of construction lumber always in stock:

**Western Douglas Fir  
West Coast Hemlock  
Southern Yellow Pine**

**Idaho White Pine  
Ponderosa Pine  
Northern White Pine**

- ★ Four to six million feet of choice Hardwoods in stock:

**Ash  
Basswood  
Beech  
Birch  
Butternut  
Cedar**

**Cherry  
Cypress  
Rock-Elm  
Gum  
Hickory  
Mahogany**

**Maple  
Oak  
Pecan  
Poplar  
Sycamore  
Walnut**

We offer the above in air-dried stock, or kiln-dried in our battery of modern kilns with a capacity of 500,000 board feet per month.

- ★ Operating the largest and best equipped woodworking plant in the eastern section of the United States, manufacturing high grade millwork for:

**Residences  
Institutions**

**Apartments  
Offices**

**Public Buildings  
Banks**

**Fabricated and Pre-fabricated Industrial Hardwoods**

- ★ In addition to large stocks of the other items shown in this catalogue.

## BREAKFAST NOOK

One more of the modern conveniences that lighten the drudgery of housework. Saves countless steps every day.

Complete unit includes: 1 Table with key and 2 Benches, knocked down.

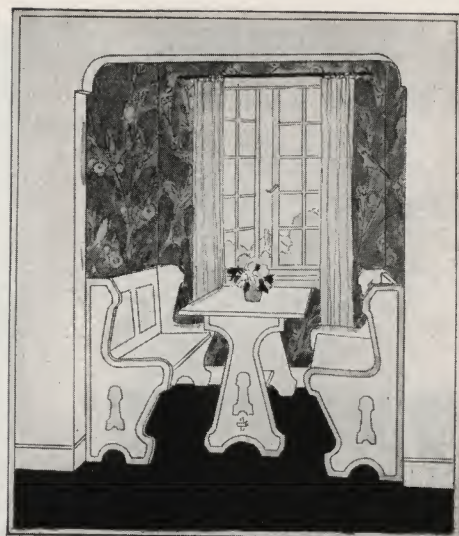

Completely and accurately machined: easy to assemble.

The engraved ends may be used against the wall if desired to show plain.

Space required—5'-2" to 5'-8" wide, 4'-6" deep.

TABLE—2'-2" wide, 4'-0" long, 2'-6" high.

SEATS—1'-6 1/4" wide, 4'-6" long, 3'-0" high.

C-6773 May be installed just as easily in the old house as in the new one, wherever there is an 18" wall space available. No plaster need be torn out, simply screw the case to the wall, with the screws which are furnished. Holes for the screws are already drilled in the casing, spaced to strike adjacent studs. Metal pins at the sides of the board slide in metal channels so that all possibility of sticking is definitely eliminated. The board is securely locked in position for use.

Overall size of the case is 1'5 3/4" wide, 5'3 1/2" high and 2 1/2" deep. The board itself is 4'4" long, 12 1/4" wide and full 1" thick. It is carefully shaped with smoothly rounded edges, designed to take a cover neatly.

## IRONING BOARDS

C-6771 The conventional built-in ironing board cabinet, designed primarily from the standpoint of economy, is exemplified by this design. No pretentious claims are made for it and while it is well constructed and practical, the prime reason for its existence is the desire to meet the demand for a practical yet really low priced board. It does however boast of a sleeveboard. No trim is included.

Overall width, 1'2"; height, 6'9 1/4"; depth, 3 15/16". Inside depth, 3". Fits between studs 16" on centers. 8 3/4" from finished floor to bottom of door. Two-panel door height is 6'0". The jambs are rabbeted to receive the 3/4" door so that any type of trim, even that with very thin edge, may be used. The ironing board is 11" wide, tapered to 7"; 3' 11 1/2" long and 3/4" thick. The sleeve board is 4 1/2" wide tapered to 3"; 2'2" long; 3/4" thick. Hardware, except hinges and catches for doors, is furnished.

steps

**We offer a FREE Kitchen  
Planning Service to help  
you!**

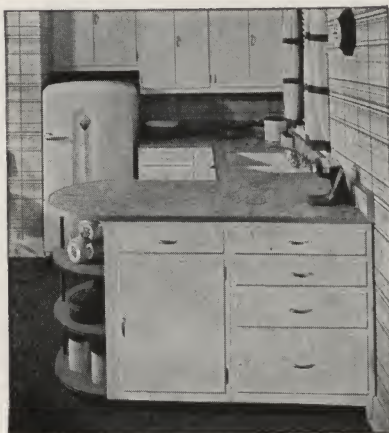

This base corner unit goes 'round a corner to save space. Provides extra room for large utensils. Same type cabinet is made for wall units as shown above counter top.

Combination Pan and Bread Drawer Unit. Made in 2 widths: 28" and 32". Two wood drawers, one metal bread drawer; storage space below. Very practical unit.

*The Popular*  
**"SERVICE BAR"**

Wall units bring everything within easy reach. Units are equipped with panel tops and two adjustable shelves. Additional shelves available at slight extra cost.

## SECTIONAL KITCHEN CABINET UNITS

### C-6704 Wall Units, 14" Deep, 36" High

In Eleven Widths

W-12	W-24	W-32
W-16	W-28	W-36
W-18	W-30	W-40
W-20		W-44

W-16

W-36

Wall Units are equipped with panel tops and two adjustable wood shelves with patented shelf rests. The corner posts are bored for several shelf positions. Additional shelves are available at slight extra cost.

All Units have 1 1/16" flush, lip doors made of solid pine reinforced with a steel angle spline set in the top and bottom rabbets to prevent warping. This type of door has better painting qualities than the type built up of ply-wood panels.

Units, 36" and wider have a 2 11/16" mullion between the doors.

### C-6710 Pan Units 24 1/2" Deep, 32" High

Equipped with one sliding wire shelf. Units 28" and wider have 2 drawers. Units 24" and wider have 2 doors. Units 36" and wider have a mullion between doors and 2 wire shelves.

D-16	D-24	D-30	D-36
D-20	D-28	D-32	D-40

Drawer units include four drawers in the 16" to 24" widths and five in the 28" to 40" widths, the single top drawer being replaced by two narrower drawers. Particularly in the wider units, the commodious lower drawers provide great capacity for linens.

All units used below the counter are furnished without tops, to be covered by counter top which must be ordered separately. All other units except Over Units are shipped tops in place.

D-20

### C-6712 Bread Drawer Units

24 1/2" Deep, 32" High

Equipped with three equal sized drawers; two of non-rusting metal, one having a vertical central division and one of wood. Metal drawers have rounded corners, easily cleaned. They are provided with ventilated sliding covers.

All drawers are interchangeable.

Another metal drawer may be substituted for the wood drawer at slight extra cost.

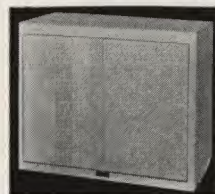

B-16

B-16

B-18

### C-6701 Refrigerator Over Units 14" Deep, 24" High

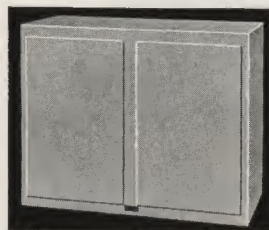

R-30

A new unit for use over refrigerator or stove. Equipped with one adjustable shelf and panel top.

R-30

C-36

### C-6707 Center Units, 14" Deep, 28" High

C-36	C-40	C-44
------	------	------

A lower storage unit than C-6704 which may be used either with or without utility units C-6706.

SC-40

### C-6726 Square Corner Unit, 32" High

SC-40

This unit, for use below the counter in a square corner installation, is constructed like a pan unit except that it has a 6 3/4" mullion dividing the front and is furnished with one fixed wooden shelf the entire width of the unit, and only one drawer and one door.

Approximately one-half of the unit is covered by the end of the abutting unit and the door and drawer are used on the exposed half of the face. The unit is interchangeable in either right- or left-hand corner.

# STAIRWORK

QUALITY  
BROWN-BORHEK

## STAIRWAYS OF DISTINCTION

We have in stock all of the parts necessary to construct the stairways shown on this page.

Also square newels and balusters.

Our designers will be glad to give you advice and estimates on new stairwork for your home whether it be a new home or to help you modernize your present stairway.

## BEAUTIFUL AND ENDURING STAIRWAYS

The stairway usually occupies a prominent position near the front entrance and is the largest single item of interior woodwork in the typical two-story home. The architectural style of the home is often indicated in the design of its stair. It is, therefore, important that the design be good.

In the past, many builders have felt that beauty in stair work was a matter of size. Modern taste demands smaller, more delicately molded forms, which made the stairs of Colonial days so delightful. Shown are excellent examples of good design in stair material. When properly constructed, a stairway may be strong and durable and yet have slender, graceful details.

## BROWN-BORHEK QUALITY

### Covers Wallpaper in One Coat!

### SPEED-EASY WALL FINISH

- THINS WITH WATER
- DRIES IN ONE HOUR
- EASY TO USE

• **HERE'S THE PAINT** for people who want to redecorate tastefully yet inexpensively. So quick and easy to use, and with such handsome results! . . . Just mix Speed-Easy with ordinary tap water—no special thinners are needed. You'll find one coat's enough even for figured wallpaper! Eight beautiful colors and white to choose from. See us for free color cards.

**For Furniture, Walls, Woodwork.** You can paint just about anything with DUCO, indoors or out. No muss or bother. And DUCO is as easy to wash as a china plate.

We carry a full line of DU PONT PAINTS:

**"DULUX" SUPER-WHITE:** This gloss white enamel for walls and woodwork stays surprisingly white.

**INTERIOR GLOSS & SEMI-GLOSS:** made in white and colors for walls and trim. Easy to use.

#### 1. EASY TO

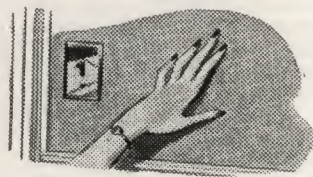

**USE.** Just thin Speed - Easy with water. Apply it with brush or roller.

It's the ideal finish for redecorating old walls and ceilings. Economical, too.

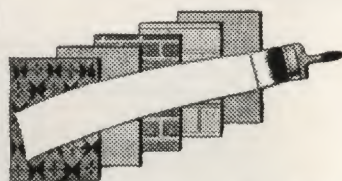

#### 2. DRY IN ONE HOUR.

You can put things back in the room within an hour and use the room again. No inconvenient delays.

#### 3. ONE COAT COV-

**ERS** almost all interior surfaces, including wallpaper, wallboard, brick, concrete, building tile, plaster. Cuts time and work in half!

**\$2.98** Per Gal.

**ONE GALLON MAKES  
1½ Gals. Ready-to-Use**

**ENOUGH FOR AVERAGE ROOM**

## DUCO "ONE COAT MAGIC"

for furniture, walls, woodwork and floors

Brings color to your home. It goes on easily—levels itself to eliminate brushmarks—covers so well that one coat is often sufficient—dries overnight—and forms a beautiful, gloss finish that retains its lustre unusually long.

The easiest enamel  
to use. Costs only:

**96¢** PINT

**MAKES THINGS LAST LONGER.** You'll like the tile-like surface DUCO gives when you first see it—but you'll be amazed when you find how well DUCO lasts!

**FLOOR FINISHES:** Made in popular colors for inside and outside floors. Tough. Durable.

**SUPER-CLEAR VARNISH:** Use it on floors, doors and woodwork. Dries quickly. Very pale. Long wearing.

**TUFCOTE VARNISH STAIN:** Varnishes and stains in one operation—for woodwork and furniture. Easy to use.

## BROWN-BORHEK QUALITY

# INSULATION PRODUCTS FOR HOME AND FARM BY CELOTEX

REG. U. S. PAT. OFF.

The Name That Means MORE to MOST People

**Celotex Vapor-seal Sheathing** is a 25/32" thick can fibre board surface-impregnated with special asphalt on sides and edges. It replaces ordinary wood sheathing in wall construction and furnishes insulation as well as structural strength.

Price .....\$73.00  
per thousand square feet

**Celotex Insulating Lath** is an ideal, economical base for plaster wherever wood, metal or gypsum lath would ordinarily be used—insulates against heat and cold—one size only 18" x 48"—thickness 1/2".

Price .....\$55.00  
per thousand feet

**Celotex Building Board** is a general purpose cane fibre insulation product for use wherever a strong, rigid, light-weight board with heat-resisting and sound-quieting properties is required.

Price .....\$55.00  
per thousand feet

**Celotex Tile Board** produces a modern, decorative effect for beauty in any interior and insulates against heat. Variety of sizes from 12" x 12" to 16" x 32" permits many interesting patterns and designs—attractive colors or can be painted to suit.

Price .....\$74.00  
per thousand feet

Time and labor, both scarce these days, are worth too much money to be wasted in continual replacement and maintenance expense. Celotex products give long, lasting service and are available now for use in the home and on the farm.

**Celotex Insulating Plank** is for interior wall and ceiling treatments in new building or remodeling—various widths, colors and textures permit many interesting designs—pleasing when erected vertically or horizontally in uniform or random widths.

Price .....\$74.00  
per thousand feet

All of the above prices are subject to a cash discount of 10%.

# BROWN-BORHEK QUALITY

# CELOTEX

Celotex Smooth Roll Roofing is economical, good looking, good wearing roofing that lays flat and stays put—comes in attractive colors in rolls in 36 foot lengths and 3 foot widths.

Prices .....\$1.35 to \$2.90  
per roll

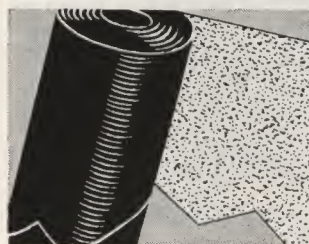

**Celotex Hex-Lox Shingles** make old roofs new—each shingle firmly locks to every other shingle and produces a tight, weather-proof roof of a most pleasing design—comes in red and green.

Price .....\$7.00  
per square

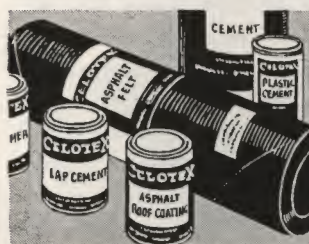

**Celotex Hex Shingles'** triple sealing process assures protection with fire-resistant granules over a heavy saturated felt base—a wide range of colors and textures adaptable for every type home.

Price .....\$5.00  
per square

**Celotex Diamond Point or Blockedge Roll Roofings** make up into handsome roofs. Attractive shingle-like patterns glitter in beautifully colored granules. Economical and lasting.

Price .....\$3.60  
per roll

**Celotex Asphalt Roof Coatings**—Available in 1 gal., 5 gal and 10 gal. cans. Cements in 1 lb., 5 lb., 10 lb. cans. For repairing and rejuvenating old roofs.

## ROOFING PRODUCTS FOR HOME AND FARM BY **CELOTEX**

REG. U. S. PAT. OFF.

The Name That Means **MORE** to **MOST** People

Farm profits depend on good management—good farm managers usually specify **CELOTEX** because of its low first cost and years of service without attention or upkeep expense.

## INSULATE FOR

**Better Poultry, Greater Production  
and Better Prices with  
Celo-Siding**

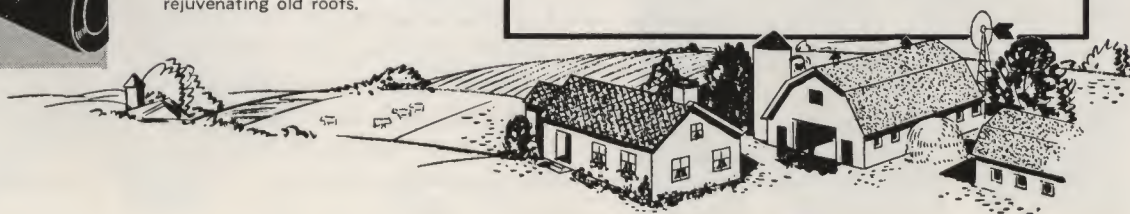

Most buildings on the farm are exposed to the elements and need weather-proofing. Celotex products give permanent protection at low cost. Hot summer sun and cold, wintry weather jeopardize poultry raising success and certainly curtail profits. Dampness and faulty ventilation in the laying house cause real losses in poultry stock and egg production. Celotex insulation corrects these conditions and generally saves its cost the first year.

Celotex Insulated  
Brooder House

Celotex Insulated  
Laying House

All of the above prices are subject to a cash discount of 10%.

## J-M DE LUXE ASBESTOS FLEXBOARD

Johns-Manville De Luxe Asebstos Flexboard is a new mirror-like wall finish for the kitchen, bathroom, laundry or playroom. You may have your choice of three designs, the "streamline" horizontal pattern, the block design patterned into large 12" squares, and the plain design. Each style is available in eight beautiful, harmonizing colors: white, ivory, yellow, peach, green, blue, black and red.

De Luxe Flexboard is easily applied with ordinary carpenter's tools over unsightly old walls or in building the walls of a new house. The large 4' x 4' and 4' x 8' sheets in which it comes can be sawed and nailed without drilling. Economical to apply and low in first cost as well, this sanitary fireproof material with its beautiful lustrous finish is adaptable to a wide variety of uses.

**Price**—Per square foot, in colors ..... **45¢**

## J-M PANELS AND PLANKS

Johns-Manville Panels and Planks are used for the interior covering of walls and ceilings to afford a complete deluxe finish to the surface.

Both Panels and Planks have the famous lightning joint providing concealed nailing and speedy application. They have a glazecoat surface which has a pre-sealed and ironed pigmented coating applied to one surface. Panels are available in two colors: white and ivory. Planks are available in three colors: ivory, graytone and rosetan. These colors were selected because of their harmonizing color tone and high light reflection.

### PER CENT OF LIGHT REFLECTION

White	Ivory	Graytone	Rosetan
79%	71%	53%	47%

Planks are packaged and furnished in widths of 10", 12" and 16", and lengths of 8', 10' and 12', 1/2" thick. Panels are packaged and furnished in sizes 12" x 12", 16" x 16" and 16" x 32", 1/2" thick.

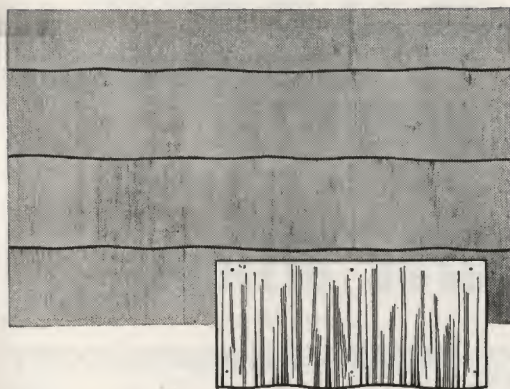

**Prices**—Per 1000 square feet. .... **\$74.00 to \$80.00**

## J-M ROCK WOOL BATTS

Johns-Manville Super Felt Rock Wool Batts, as the name implies, are "wool" made from rock—literally a soft wool-like material composed of mineral fibres which enclose millions of tiny air cells. Super Felt Batts are fabricated to size for installation between wall, ceiling and roof framing members in conventional construction. Each batt has cemented to it, with asphalt, a vapor-barrier membrane with projecting flanges for nailing on its two sides. This serves the double purpose of providing protection against the condensation of moisture vapor and also a means of stapling or nailing the batts in position. Batts are furnished in both Full Thik (3 1/2") and Semi Thik (2"). The standard sizes, designed for installation in conventional framing on 16" center are 15" by 23" and 15" by 48". They may also be obtained in 19" and 23" widths for installation in framing 20" or 24" on center. This material is also furnished in blanket form in 1", 2", and 3" thicknesses and in 15", 19" and 23" widths.

**All of the above prices are subject to a cash discount of 10%.**

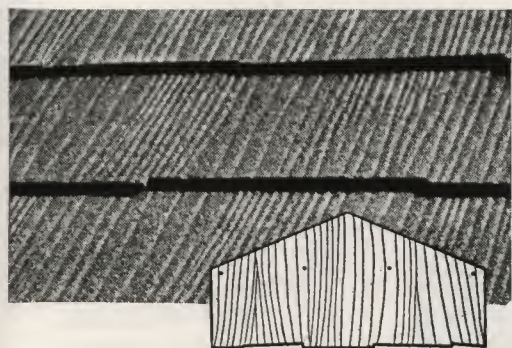

## J-M ASBESTOS SIDING SHINGLES

Johns-Manville Asbestos Siding shingles are made of asbestos fibre and cement. They are fireproof, weatherproof and easy to apply. They never require painting or other preservative treatment. Unaffected by snow and ice, hot sunshine or tropical rains they will last with little or no maintenance as long as the building stands. They are adaptable to both new construction and remodelling.

Nail holes are factory punched. The shingles can be easily and accurately cut by using an asbestos shingle cutter.

They are furnished in units 12" x 24", approximately 5/32" thick. Approximate weight per square—185 lbs. Furnished in straight or wavy butt design; in colors gray, white and attractive Permatone shades. Prices per square (enough shingles to cover 100 sq. ft.)

**\$8.90 and \$9.25**

## J-M ASBESTOS ROOFING SHINGLES

Johns-Manville American Colonial Roofing Shingles (No. 607) are made of two imperishable materials—asbestos fibre and cement. They can not burn and, therefore, greatly reduce the hazard of roof communicated fires. Ready for use as soon as applied, and require no preservative treatment at any time. The unique design of this shingle results in a saving of material, saving of weight and speed up of application. For a durable lifetime roof, this shingle undoubtedly has the lowest cost when measured in terms of dollars per year of service.

**Colors**—Natural Gray, Red Blend, Black Blend, Green Blend.

**Size**—30" long by 14" high at the peak, Approximately 3/16" thick.

**Weight**—Natural Gray, approximately 260 lbs. per sq. other colors approximately 290 lbs. per sq.

**Price per Square**—(Enough shingles to cover 100 sq. ft. of roof area)

**\$10.40**

## J-M ASPHALT ROOFING SHINGLES

Johns-Manville manufactures a complete line of asphalt roofing shingles with a wide range of color and design. These shingles are made on a selected rag-felt base, saturated and coated with high-grade asphalt and surfaced with mineral granules.

The Thick Butt Asphalt Shingles (See photo) are scientifically designed to provide extra material on the portion that is exposed to the weather. These shingles are fire resistant and thus reduce the hazard of roof communicated fires. They carry the Underwriters' Class C label.

**Size**—36" long by 12" high—three tabs. Thickness at butt, approximately 1/8".

**Weight**—Approximately 210 lbs. per square, including packaging materials.

**Prices per Square**

**\$7.00**

## J-M SLATEKOTE AND PILOT ROLL ROOFING

Johns-Manville Slatekote and Pilot Roll Roofing are made on a base of selected Rag-Felt saturated with asphalt and then coated on both sides with a weather resistant asphalt. The Slatekote type has a layer of mineral granules imbedded in the top asphalt coat and the Pilot type has a smooth surface. Both are furnished in rolls 36" wide by 36' long.

**Weights**—Slatekote, approximately 90 lbs. per square. Heavy Pilot, approximately 55 lbs. per square. Extra Heavy Pilot, approximately 65 lbs. per square.

**Colors**—Slatekote: red, green, and black. Pilot: natural color of the black asphalt base.

**Prices per Roll Slatekote**

**\$3.00**

In addition Johns-Manville also manufactures a complete line of lighter weight smooth surface roofings.

**All of the above prices are subject to a cash discount of 10%.**

BRADS AND FLAT HEAD NAILS

# LAMINATED RAFTERS

**BROWN-BORHEK  
QUALITY**

## RILCO Rafters Combine Wall and Roof Framing into a Single Strong Unit

RILCO Rafter Arches are a continuous unit from foundation to roof ridge. Thus wind stresses and roof loads are transmitted along the arch directly to the foundation. The weakest point in an ordinary frame building is the joint between side wall and roof framing. RILCO eliminates this weak point because it eliminates this joint.

## Post-FREE MACHINE SHEDS

Wide, post-free machine sheds are easily and readily built with RILCO Rafter Arches. The clear, unobstructed floor space gives a large free working area.

It provides for easy movement and storage of large and small pieces of equipment.

## HOG HOUSES

RILCO Rafter Arches are designed for several types of hog houses. Whether you require a large two-story hog house with space for bedding storage overhead, or a small individual farrowing house, RILCO can meet your requirements.

## BRACE-FREE BARN

RILCO Barn Rafter Arches provide the strongest known barn framing—and because the RILCO Rafter Arch is a continuous framing member from foundation to roof ridge, the weakest point of ordinary construction,

the joining of side wall and roof is eliminated and greater strength and wind-resistance results.

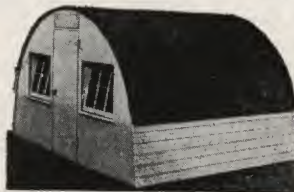

Whether your requirements are for a one-story barn of smaller size without hay storage space or a large typical dairy barn with full mow storage, RILCO designs and factory builds a better, stronger Rafter Arch for an improved modern farm building.

## A STRONGER, SINGLE UNIT RAFTER ARCH

RILCO factory-built Rafter Arches are made of selected kiln-dried lumber—laminated and permanently bonded with modern structural glues. RILCO'S correct engineered design, precision manufacture, and quality materials combine to produce Rafter Arches and building frames of superior strength and rigidity—far surpassing the strength of ordinary frame construction.

RILCO further adds to the strength of the structure by two special methods of joining. For Anchoring the base of the Rafter Arch to sill and foundation, RILCO makes angle iron connectors of great strength. For Joining Rafter Arches at roof peak or ridge, RILCO provides ridge-irons of special design.

## BROODER HOUSE

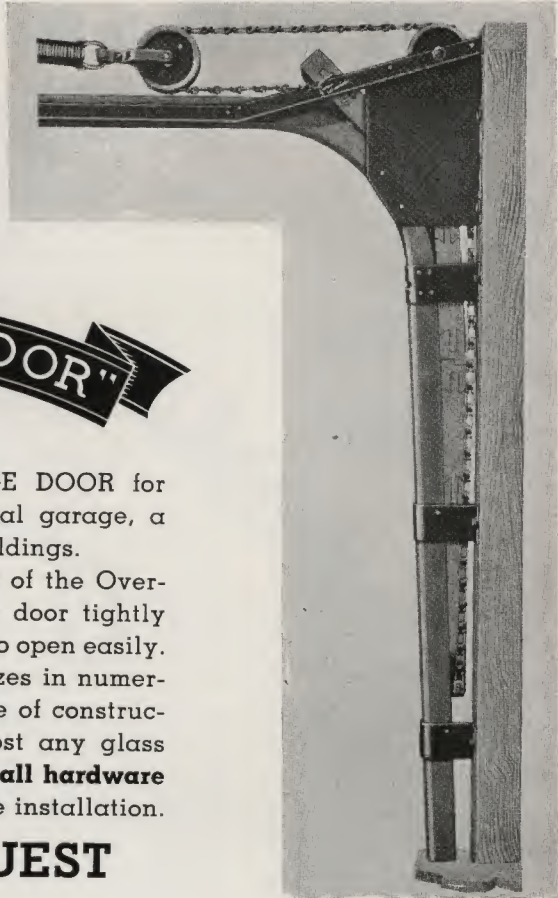

RILCO brooder house Arches are available in standard sets of four arches for a 12' x 10' house as illustrated. The RILCO Arch shape house assures maximum floor space with a minimum of waste space overhead to be heated.

RILCO Arches make a brooder house that is light in weight, yet rigid, strong and sturdy and easily moved to clean ground with team or tractor.

## LAYING HOUSE

This is the most popular type of RILCO laying house. Straight side wall in front provides most convenient lighting, and RILCO Rafter Arches of this type assure extra strength and a minimum of waste space in the house.

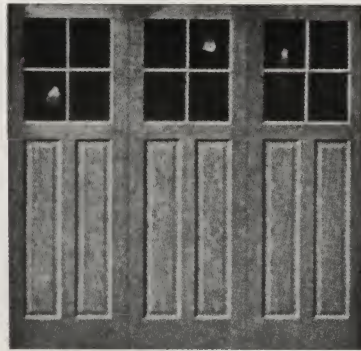

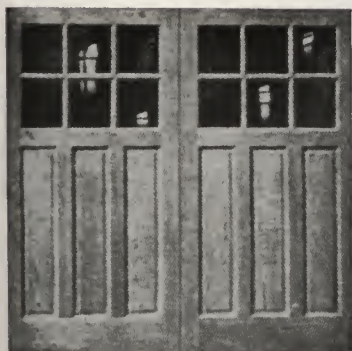

## THE "OVERHEAD DOOR"

There is an OVERHEAD GARAGE DOOR for every purpose, be it for a residential garage, a commercial garage or industrial buildings.

The MIRICLE WEDGE is the heart of the Overhead Door. Note how it wedges the door tightly against the jamb yet allows the door to open easily.

Made in stock sizes and special sizes in numerous designs to blend with every type of construction. Doors are available with almost any glass arrangement and are **furnished with all hardware** and complete instructions to facilitate installation.

### PRICES ON REQUEST

The conventional type garage doors pictured above are made of clear vertical grain Fir.

They are 1 3/4 inches thick which means durability. Expert workmanship makes them the finest doors that we know of.

They are sold unglazed and without hardware.

# WALL BOARDS

WALLBOARDS have become an important factor in the building field because of their varied uses, ease of installation and economy.

## HARDBOARD

A smooth surfaced, compressed fibre board with an extremely hard surface. Brown in color, it is knotless, grainless and splinterless and especially adaptable for sidewalls and wainscots, for table tops, counters and exteriors.

It defies heat and cold, and is moisture proof. Properly applied it will not chip, crack or warp, and can be painted any color.

Very popular because of its strength in comparatively thin sheets.

1/8" Presdwood .....	8c per sq. ft.
3/16" Presdwood .....	10c per sq. ft.
1/4" DeLuxe Panel Board .....	8c per sq. ft.
1/8" Tempered Presdwood .....	10c per sq. ft.
3/16" Tempered Presdwood .....	12c per sq. ft.
1/4" Tempered Presdwood .....	15 1/2c per sq. ft.

## UPSON BOARD

**3/16" Upson Board** . . . An economical fibre board of unusual strength, cream in color and with a pebbled surface, available in 48" widths 6'-7'-8'-9' and 10' lengths—@ **5c** per sq. foot. **3/16" Green Board** . . . a fibre board similar to the above with a softer surface and light green in color, also available in 48" widths 6'-7'-8'-9' and 10' lengths—@ **4c** per sq. foot.

All the above prices are subject to cash discounts of 10%

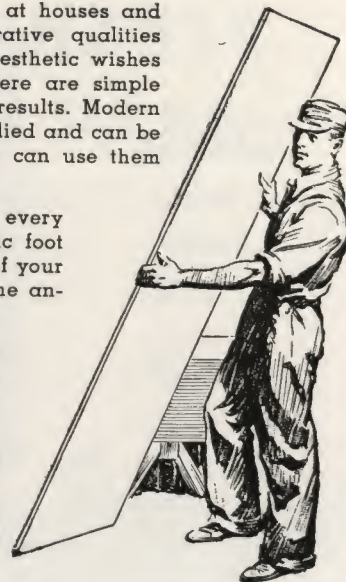

# BROWN-BORHEK QUALITY

If you have been looking at houses and you feel that their decorative qualities don't measure up to your esthetic wishes just bear in mind that there are simple ways to secure hoped-for results. Modern wall-boards are easily applied and can be beautifully decorated. You can use them almost anywhere.

If you are trying to make every possible use of every cubic foot of space within the walls of your home then wall-board is the answer to your problem.

Old rooms that have seen better days can be attractively renewed, economically.

Panelling, moulding and other decorative treatments, possible with wall-boards, will make an old house seem new.

## MONOWALL

An ideal choice of decorative wall board for bathrooms, kitchens, or other rooms in homes, as well as for commercial and public interiors. Is available in plain colors and title designs.

Installation is fast and litter free . . . rooms are ready for use immediately. Aside from normal care and freedom from abuse, MONOWALL needs only an occasional wiping with water and mild soap to keep its tough, durable surface looking spic-and-span.

Sold in 48" widths, 4'-5'-6'-7'-8'-10' and 12' lengths @ . . . . . **38c** per sq. ft.

## GYPSUM WALL BOARD

**3/8" Gypsum Board** . . . a rigid fire-proof wall board very popular for interior finish and partitions—sold in 48" widths—6'-7'-8'-9' and 10' lengths @ . . . . . **4 3/4c** per sq. ft.

**1/2" Laminated Gypsum Board** . . . a wall board similar to the above with one ply roofing laminated one side. Excellent for temporary, yet weatherproof shelters on the farm. Available in sheets 24" x 96"—square edge—@ . . **8 1/2c** per sq. ft.

# BARN PAINT

made by

## PROTECTS AND KEEPS YOUR BARNS LOOKING THEIR BEST

For your barns and outbuildings here's real protection and good looks in a *linseed oil* paint that covers well and resists the savage attacks of the weather. Wind and rain generally have a clean sweep at farm buildings, you know. But when you protect them with this time proved, oxide paint you preserve the surface from rust, rot and decay.

Use Du Pont Barn and Roof Paint on wood or metal buildings and on metal roofs as well. It goes on easily and is ready for use just as it comes in the container. This durable red oxide paint covers 250-300 sq. ft. per gallon *two coats*. It protects your investment and makes your place look its best. Only ..... \$2<sup>35</sup> per gal.

## NEW HOUSE PAINTS *developed by* DU PONT

For houses—or for trimming red barns—there's nothing like Du Pont No. 40 Outside White.

### IT KEEPS WHITE HOUSES WHITE

Du Pont House Paint contains titanium dioxide—the whitest of paint pigments—to make your house the whitest of white houses. And it will *stay* white because . . .

### IT'S SELF CLEANING

Many white paints collect and hold dirt and dust from the atmosphere. This dirt collection results in prematurely dirty, gray houses that look unattractive. Houses painted with Du Pont Outside White maintain a cleaner appearance because certain chemical characteristics enable this paint to "clean itself." Available in colors, too—only ..... \$3<sup>60</sup> per gal.
